

Driven by a deep desire to offer an alternative to traditional textiles, which unfortunately deplete tremendously our natural resources, "Lea & Jojo" offers a collection of children's coats that combine quality, ecological awareness, social ethics, and safety.

Plastic is one of the most polluting materials used daily in modern day society; bottles, bags, clothes, cars, decorations, accessories of all sorts... Unfortunately, only a little amount of these materials is recycled around the world.

We recycle more than 23 Pet bottles to make 1 of our little coat.

Our shell and Lining fabrics are Breathable, Waterproof, BLUE SIGN and GLOBAL STANDARD RECYCLED (GRS) certified. Our rib, is 100% Biological Cotton, GOTS certified.

No PHTALATES, nor PVC, nor PFAO'S, nor PFO'S, nor AZO DYIES, nor NONYPHENOL ETHOXYLATES.

All our coats are tested by the internationally recognized Swiss laboratories SGS.

LEA & JOJO is a sweet mixture of utopia and candour. Because the planet of tomorrow is not impervious to our actions and our future is in our hands.
