NUECES

BABY KID TEEN SWIMWEAR KNIT

GREEN SOUL

Welcome to NUECES´S imaginary forest

The Spanish fashion brand launches "**GREEN SOUL**", its new proposal for this SS21. The pieces in the collection are made in a palette of soft colours: white, raw and pink, together with mustards, black and grey, which transport us to a forest full of flowers, trees and aromas.

His new collection is an ode to Nature, fresh and clean. She hardly presents any prints this season and this time they stand out in the garments; the colour, big bows and strategic flounces that give the dresses movement. The fabrics chosen for this occasion have been taffeta, organza, linen and cotton.

This season **NUECES** as in previous editions presents lines for baby, girl, teen, knit, bath and a small collection of accessories to go to the beach or of course, to your particular forest.

One more year, it continues betting for the responsible manufacture 100 % between Spain and Portugal. A collection that transmits strength, personality and modernity without giving up quality.
